

Key Business Insights

1. Overall Performance

- The business generated **\$3.52 million in total revenue** from **1,000 orders**.
- The **average customer spend is \$3,520.98 per order**, indicating a relatively high order value.
- The average **order-to-delivery time is 5.53 days**, which could be monitored to improve customer satisfaction and delivery efficiency.

2. Revenue by Occasion

- **Anniversary** generates the highest revenue at approximately **\$675K**, making it the strongest occasion category.
- **Raksha Bandhan** follows with around **\$635K**, while **All Occasions** contributes approximately **\$590K**.
- **Valentine's Day** and **Diwali** have comparatively lower revenue, at around **\$330K** and **\$310K** respectively.
- This suggests that **Anniversary and Raksha Bandhan campaigns/products are particularly successful** and could receive more promotional focus.

3. Revenue by Product Category

- **Colors** is the highest-revenue category, contributing approximately **\$1.0M**.
- **Soft Toys** and **Sweets** are the next strongest categories, generating roughly **\$730K** and **\$720K**.
- **Plants** and **Mugs** have the lowest revenue, at approximately **200K–210K**.
- The business could explore **bundles and promotions for lower-performing categories** to increase their contribution.

4. Geographic Performance

- **Imphal** has the highest number of orders, with approximately **108 orders**.
- **Dhanbad and Kavali** follow with around **84 orders each**.
- Haridwar, Dibrugarh and Bhatpara also show strong order volumes.
- This indicates that these cities could be considered **high-potential markets for targeted marketing and customer retention campaigns**.

5. Monthly Revenue Trends

- Revenue shows significant seasonal fluctuations.

- **August is the strongest month**, reaching approximately **\$730K**, followed by **February** at around **\$700K**.
- **March** also performs strongly with approximately **\$500K**, while **November** reaches around **\$440K**.
- Revenue drops considerably during **January, April, September and December**.
- The business should investigate the reasons behind the August and February peaks and use similar strategies during weaker months.

6. Top Products by Revenue

- **Magnum Set** is the highest-performing product, generating approximately **\$121K**.
- **Quia Gift** is second at around **\$114K**.
- **Dolores Gift** and **Harum Pack** generate approximately **\$106K** and **\$101K**.
- These products could be prioritized for **inventory planning, promotions and cross-selling**.

7. Revenue by Order Hour

- Revenue is generally strongest during the **evening hours**, particularly around **18:00–21:00**.
- The highest point appears around **19:00–20:00**, reaching approximately **\$185K**.
- Revenue falls noticeably around **10:00** and again around some afternoon hours.
- Marketing campaigns, promotional notifications and targeted offers could therefore be scheduled around **peak evening purchasing hours**.

Overall Business Takeaways

1. **Anniversary is the strongest occasion**, so it should remain a major marketing focus.
2. **Colors, Soft Toys and Sweets are the major revenue drivers** and should receive strong inventory support.
3. **August and February are peak revenue months**, suggesting strong seasonal/occasion-based demand.
4. **Imphal is the leading city by order volume**, making it an important market for customer retention.
5. **Evening hours generate the highest revenue**, so promotions should be concentrated around these periods.
6. **Magnum Set is the top individual product**, making it a good candidate for featured promotions and bundles.
7. Lower-performing categories such as **Mugs and Plants** may need better promotions, product positioning or bundling.
8. The **5.53-day delivery time** is an important operational metric that could be improved to enhance the overall customer experience.
